Subject: Workshop on "DATA & NETWORK Security: Economy & The Technologies"

Dear Sir/Madam,

Appin Technologies, based out of Austin, Texas (USA), is the premier provider of Hi-Technology, certification, courseware as well as online computer based and instructor led training across the world. Appin is primarily an IIT alumni company. Appin has come up with the way of innovative learning concept using Computer Based Training Software (CBTS) in a highly interactive environment.

Appin Technology Lab is an innovative concept of imparting Hi-technology training to students and young professionals in niche areas like Information Security & Ethical Hacking, Nanotechnology, Embedded Systems, Robotics, Application programming and other in demand technologies. Appin flagship job oriented Diploma and certificate courses are recognized and accepted worldwide and popular among HR managers from companies such as IBM, TCS, Infosys, Nucleus software, Microsoft etc.

Information Technology is by far the most dynamic and ever evolving medium affecting, facilitating and simplifying human life and living. Today, after the boom in Networking and Software jobs, the past few years have seen a sharp rise in the field of Information Security. Information Security and Ethical Hacking is the latest buzzword in the industry and not without reason; in the past five years, the percentage of hacking crimes, data thefts, data loosed, viruses and other cyber crimes have increased exponentially.

"NASSCOM predicts requirement of 1, 88,000 IT Security professionals by the year 2016. Currently the number of security professionals in India is around 22,000" and according to Indian Govt. "There will be a demand of 4.7 lakh cyber security professionals by 2015 for protection of IT infrastructure in the country as well as to serve the export market".

Bearing this in mind, we at Appin Technology Lab like to conduct a technical workshop on "DATA & NETWORK Security: Economy & The Technologies".

We request you to join us, as we look at the current trends and future of Information Security and Secured Programming and how we can benefit from it. We would also like to extend this invitation to the Training and Placement Officer, HOD's of your college, as well as the students of the B.C.A and M.Sc(IT) department of your esteemed college, for then the Workshop/Seminar could be a real value add.

Hoping for a favorable response.
