Guru Nanak Sacred Forest – A Mini Urban Forest

Sri Guru Gobind Singh College initiated a novel idea of creating Guru Nanak Sacred Forest - A Mini Urban Forest with native species (GNSF) on Campus in April 2019 with an objective to promote a sustainable environment. This habitation has now flourished into a natural air-purifying dense forest with 550 trees comprising 37 different native species of the region planted in an area of 180 square metres. With the creation of the mini-urban forest, the College has made a niche in the field of environment sustainability, biodiversity conservation and preservation of genetic heritage. This tiny forest space is acting as a safe refuge for insects, birds and other fauna that are gradually disappearing from the ecosystem and is a major step in reducing the Carbon Footprint of the region.

Balihari Kudrat Healing Herbs Garden is a designated area in the mini urban forest to plant sacred herbs.

GNSF Committee members are involved in writing and presenting Research Papers/Projects:

- **Afforestation and Conservation of Native Plants for Sustainable Development – A Study of Guru Nanak Sacred Forest, Sri Guru Gobind Singh College, Chandigarh** contributed by **Dr Navjot Kaur** (Principal), SGGS College, **Dr Inderpal Pasricha**, **Dr Mandeep Kaur Dhama**, Assistant Professor, (PG Deptt of Chemistry) and **Ms Meena Jindal**,

The Sacred Forest amalgamates the aspects of **ecosystem diversity, curative diversity (a wide variety of medicinal plants) and cultural diversity (including spiritual values)** very successfully.

The Air Quality Index is installed on the outer wall of Guru Nanak Sacred Forest to report the Air quality daily. The AQI parameters reported are quite satisfactory due to the green cover.
